Advanced Database Query Systems: Techniques, Applications and Technologies

Li Yan (Northeastern University, China) and Zongmin Ma (Northeastern University, China)

Databases are designed to support data storage, processing, and retrieval activities related to data management. The use of databases in various applications has resulted in an enormous wealth of data, which populates many types of databases around the world.

Advanced Database Query Systems: Techniques, Applications and Technologies focuses on technologies and methodologies of database queries, XML and metadata queries, and applications of database query systems, aiming at providing a single account of technologies and practices in advanced database query systems. This book provides the state of the art information for academics, researchers and industry practitioners who are interested in the study, use, design and development of advanced and emerging database queries with ultimate aim of building competencies for exploiting the opportunities of the data and knowledge society.

Topics Covered:
- Categorization of web database query results
- Concept-oriented model and query language
- Flexible querying of imperfect temporal metadata
- Fuzzy approach to flexible database querying
- Pattern-based schema mapping in peer-to-peer
- XML data integration
- Querying graph databases
- Querying multimedia data
- Spatial data infrastructures
- SQL for fuzzy multidatabases
- Storing and querying RDF data

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

Li Yan received her Ph.D. degree from Northeastern University, China. She is currently an Associate Professor of the School of Software at Northeastern University, China. Her research interests include database modeling, XML data management, as well as imprecise and uncertain data processing. She has published papers in several journals such as Data and Knowledge Engineering, Information and Software Technology, International Journal of Intelligent Systems and some conferences such as WWW and CIKM.

Print: US $180.00  |  Perpetual: US $255.00  |  Print + Perpetual: US $360.00
Section 1:

Chapter 1
Automatic Categorization of Web Database Query Results
Meng Xiangfu (Liaoning Technical University, China)
Yan Li (Northeastern University, China)
Ma Z. M. (Northeastern University, China)

Chapter 2
Practical Approaches to the Many-Answer Problem
Bechchi Mourir (LINA-University of Nantes, France)
Rasechia Guillaume (LINA-University of Nantes, France)
Mosaadili Noureddine (LINA-University of Nantes, Morocco)

Chapter 3
Concept-Oriented Query Language for Data Modeling and Analysis
Savinov Alexander (SAP Research Center Dresden, Germany)

Chapter 4
Evaluating Top-k Skyline Queries Efficiently
Gonzalves Marlene (Universidad Simón Bolívar, Venezuela)
Vidal Maria Esther (Universidad Simón Bolívar, Venezuela)

Chapter 5
Remarks on a Fuzzy Approach to Flexible Database Querying, Its Extension and Relation to Data Mining and Summarization
Kazprzyk Janusz (Polish Academy of Sciences, Poland)
De Tre Guy (Ghent University, Belgium)
Zadrozny Slawomir (Polish Academy of Sciences, Poland)

Chapter 6
Flexible Querying of Imperfect Temporal Metadata in Spatial Data Infrastructures
Bordogna Gloria (CNR-IDPA, Italy)
BBCC Francesco (CNR-IREA, Italy)
Carrara Paolo (CNR-IREA, Italy)
Pepe Monica (CNR-IREA, Italy)
Rampini Anna (CNR-IREA, Italy)

Chapter 7
Fuzzy Querying Capability at Core of a RDBMS
Agalera Ana (Universidad de Carabobo, Venezuela)
Cadenas José Tomás (Universidad Simón Bolívar, Venezuela)
Tineo Leonid (Universidad Simón Bolívar, Venezuela)

Chapter 8
An Extended Relational Model & SQL for Fuzzy Multidatabases
Sharma Awadhesh Kumar (M.M.M. Engg College, India)
Goswami A. (IIT Kharagpur, India)
Gupta D.K. (IIT Kharagpur, India)

Section 2:

Chapter 9
Pattern-Based Schema Mapping and Query Answering in Peer-to-Peer XML Data Integration System
Pankowski Tadeusz (Pożnań University of Technology, Poland)

Chapter 10
Deciding Query Entailment in Fuzzy OWL Lite Ontologies
Cheng Jingwei (Northeastern University, China)
Ma Z. M. (Northeastern University, China)
Yan Li (Northeastern University, China)

Chapter 11
Relational Techniques for Storing and Querying RDF Data:
Sakr Sherif (University of New South Wales, Australia)
Al-Naymat Ghazi (University of New South Wales, Australia)

Section 3:

Chapter 12
Making Query Coding in SQL Easier by Implementing the SQL Divide Keyword:
Draken Eric (University of Calgary, Canada)
Gao Shang (University of Calgary, Canada)
Alhajj Reda (University of Calgary, Canada & Global University, Lebanon)

Chapter 13
Querying Graph Databases:
Sakr Sherif (University of New South Wales, Sydney, Australia)
Al-Naymat Ghazi (University of New South Wales, Sydney, Australia)

Chapter 14
Querying Multimedia Data by Similarity in Relational DBMS
Borioni Maria Camila Nardi (Federal University of ABC, Brazil)
Kaster Daniel dos Santos (University of Londrina, Brazil)
Razente Humberto Lutz (Federal University of ABC, Brazil)
Traina Agma Jaci Machado (University of São Paulo at São Carlos, Brazil)
Júnior Caetano Traina (University of São Paulo at São Carlos, Brazil)
