International Journal of

Software Innovation (IJSI)

Editor(s)-in-Chief: Roger Y. Lee (Central Michigan University, USA) and Lawrence Chung (University of Texas at Dallas, USA)

The **International Journal of Software Innovation (IJSI)** covers state-of-the-art research and development in all aspects of evolutionary and revolutionary ideas pertaining to software systems and their development. The journal publishes original papers on both theory and practice that reflect and accommodate the fast-changing nature of daily life. Topics of interest include not only application-independent software systems, but also application-specific software systems like healthcare, education, energy, and entertainment software systems, as well as techniques and methodologies for modeling, developing, validating, maintaining, and reengineering software systems and their environments.

Individual Pricing

Print + Free E-Access: **$275.00**
E-Access + Free Print: **$275.00**

Institution Pricing

Print + Free E-Access: **$765.00**
E-Access + Free Print: **$765.00**

Topics Covered:

- Big data, data sciences
- Bio-informatics
- Cloud computing, sustainable software/computing infrastructure
- Consumer electronics
- Convergent technologies
- Cyber-physical systems
- Data mining, intelligent knowledge retrieval, knowledge visualization
- Decision Support Systems
- E-earth/nation/city/home/health/transportation/etc.
- E-science and technology, E-learning
- Expert systems, natural/artificial intelligence
- Global collaborative systems
- Human-machine interface, human-computer interaction, usability engineering
- Information systems, web-based systems
- Multimedia, computer graphics
- Operating systems
- Real-time embedded systems
- Robotics
- Security, privacy, trustworthiness, intellectual rights
- Smart phone applications, mobile computing
- Social Networking
- Systems engineering, control systems
- Telecommunications
- Ubiquitous systems
- Virtual reality, computer games

SUBMISSION INFORMATION

Prospective authors should note that only original and previously unpublished articles will be considered. INTERESTED AUTHORS MUST CONSULT THE JOURNAL'S GUIDELINES FOR MANUSCRIPT SUBMISSIONS at http://www.igi-global.com/journals/guidelines-for-submission.aspx PRIOR TO SUBMISSION. All article submissions will be forwarded to at least 3 members of the Editorial Review Board of the journal for double-blind, peer review. Final decision regarding acceptance/revision/rejection will be based on the reviews received from the reviewers. All submissions must be forwarded electronically.

All submissions and inquiries should be directed to the attention of:
Roger Lee, lee1ry@cmich.edu or Lawrence Chung, chung@utdallas.edu

All manuscript submissions to IJSI should be sent through the online submission system:
http://www.igi-global.com/authorseditors/titlesubmission/newproject.aspx

EDITOR-IN-CHIEF BIO

Roger Lee is a professor in the Department of Computer Science at Central Michigan University where he created and is currently teaching a series of courses in Software Engineering as well as conducting research and publishing papers in the Software Engineering field. He is the director of the Software Engineering Information Technology Institute (SEITI) at Central Michigan University where he is responsible for bringing in research grants and supervising research activities at the institute. Dr. Lee is also the founder and CEO of the Association for Computer and Information Science (ACIS), which sponsors a number of conferences each year including the International Conference on Computer and Information Science (ICIS), which is cosponsored by the IEEE Computer Society annually, which averages over 100 published papers each conference. He received his Ph.Ds from Shizuoka University and University of Southern Mississippi, respectively.

Lawrence Chung is an associate professor, Department of Computer Science, at The University of Texas at Dallas. His research areas include system/software engineering, with a special interest in requirements and architecture, and is the principal author of the research monograph *Non-Functional Requirements in Software Engineering*. Recently, he has been working on Cloud Computing, mobile applications for people with physical and mental difficulties, home energy control and management, etc., using conceptual modeling approaches. He obtained all his degrees in Computer Science from University of Toronto.
