

Green Services Engineering, Optimization, and Modeling in the Technological Age

Part of the Advances in Environmental Engineering and Green Technologies (AEEGT) Book Series

Xiaodong Liu (Edinburgh Napier University, UK) and Yang Li (British Telecom, UK)

Description:

Concerns surrounding environmental sustainability have led to an increase of interest in environmentally-friendly systems. In the ICT realm, attention has been largely paid to green aspects of hardware; however, it is equally necessary to address this issue from the software perspective.

Green Services Engineering, Optimization, and Modeling in the Technological Age is a valuable reference source of the latest scholarly research on the implementation of green processes into software systems, contributing novel principles, methodologies, and tools to improve software development. This book features comprehensive and timely coverage on various areas in service strategy and modeling, engineering, and sustainability.

Readers:

This publication is a pivotal reference source for researchers, practitioners, advanced-level students, and end users in the software development realm.

ISBN: 9781466684478

Release Date: May, 2015

Copyright: 2015

Pages: 320

Topics Covered:

- Ad Hoc and Sensor Networks
- Cloud Carbon Abatement
- Cloud Computing
- Cultural Considerations
- Enterprise Grids
- Sustainable Service
- Telephone Exchanges
