

# Analyzing the Economics of Financial Market Infrastructures

Part of the Advances in Finance, Accounting, and Economics (AFAE) Book Series

**Martin Diehl (Deutsche Bundesbank, Germany), Biliana Alexandrova-Kabadjova (Banco de México, Mexico), Richard Heuver (De Nederlandsche Bank, The Netherlands), Serafín Martínez-Jaramillo (Banco de México, Mexico)**

## Description:

The prosperity and stability of any economic structure is reliant upon a foundation of secure systems that regulate the movement of money across the globe. These structures have become an integral part of contemporary society by reducing monetary risk and increasing financial security.

**Analyzing the Economics of Financial Market Infrastructures** is a pivotal reference source for the latest scholarly research on the current developments in financial systems and how these processes are evolving due to new regulations and technical advances.

This book features timely, research-based chapters on a variety of crucial topics including, but not limited to, payment timing, multi-layer networks, transaction simulations, payment system analysis, and regulation of financial marketplaces.

## Readers:

This book is an essential reference source for professionals in the financial sector, analysts, IT professionals, and academicians concerned with emerging research on financial markets.
