

GUEST EDITORIAL PREFACE

**Special Issue from the 6th  
Bio-Inspired Computing:  
Theories and Applications  
Conference (BICTA2011) (Part 2)**

*Rosni Abdullah, Universiti Sains Malaysia, Malaysia*

*Ahamad Tajudin Khader, Universiti Sains Malaysia, Malaysia*

*K. G. Subramanian, Universiti Sains Malaysia, Malaysia*

*Ibrahim Venkat, Universiti Sains Malaysia, Malaysia*

*Wong Li Pei, Universiti Sains Malaysia, Malaysia*

This issue is Part 2 of a special issue of the *International Journal of Natural Computing Research* (IJNCR) consisting of enhanced refereed versions of selected papers of the sixth edition of the international conference: Bio-Inspired Computing – Theories and Applications (BIC-TA), held in Penang, Malaysia, September 27-29, 2011, organized by Universiti Sains Malaysia with the technical support of IEEE Computer Society, Malaysia. Part I of this special issue consisted of papers related to DNA computing, Membrane Computing and other related areas while this Part II consists of papers related to evolutionary computing. The abundant support and guidance received from

the Editor-in-Chief Prof. Leandro Nunes de Castro and the IJNCR editorial board member Dr. Pierluigi Frisco for this BICTA2011 special issue are gratefully acknowledged. The guest editors acknowledge the excellent support received from the publishing team.
