The **Journal of Information Technology Research (JITR)** presents comprehensive interdisciplinary and refereed research on the most emerging and breakthrough areas of information science and technology. The journal seeks to improve and expand existing research in underrepresented areas of information science and technology in all areas of global implication. Through the current trends in the globalization of technology in the knowledge society, JITR will serve to provide the highest in quality concepts, methodologies, trends and case studies for all audiences.

The journal focuses on major breakthroughs within the technological arena, with particular concentration on the accelerating principles, concepts and applications of biocomputing, medical informatics, anthropocentric computing, high-performance computing, technological diffusion, predictive analysis tools, genetic algorithms, and cultural informatics. This scholarly resource endeavors to provide international audiences with the highest quality research manuscripts and accounts of the constant evolution of information science and technology in whole. Researchers, academicians, practitioners and students will find this journal as a critical source of reference for all advanced technological applications and developments.

### Topics Covered:

- 3-D imaging and printing technologies
- Agricultural informatics
- Anthropocentric computing
- Artificial immune systems and technologies
- Assistive technologies
- Biodiversity applications
- Bioethics, Bioinformatics, and Biotechnology
- Biomaterials and nanotechnology
- Biometrics, Biosensors, and Biosurveillance
- Bioterrorism and situational awareness
- Cellular automata
- Chemoinformatics
- Cloud computing
- Cognitive informatics
- Cultural algorithms and cultural informatics
- Digital ecosystems and digital forensics
- Drug discovery technologies
- Ecological modeling
- Evidence-based medicine
- Flexible and adaptive technologies
- Gaming technologies
- Genomics and proteomics
- Haptics
- High performance computing
- Health information technologies
- Human computing and technologies
- Image and speech recognition
- Medical technology
- Multicore technology
- Nanotechnology
- Optoelectronic technologies
- Predictive analysis tools
- Pharmaceutical informatics
- Quantum informatics
- Radiology technologies
- Sensor technologies
- Social and surgical informatics
- Tablet technologies
- Telemedicine, Telenursing, and Telesurgery
- Tissue engineering applications
- Surveillance technologies
- Virtualization
- Wearable computing
- Wireless technologies

### SUBMISSION INFORMATION

Prospective authors should note that only original and previously unpublished articles will be considered. INTERESTED AUTHORS MUST CONSULT THE JOURNAL'S GUIDELINES FOR MANUSCRIPT SUBMISSIONS at <http://www.igi-global.com/journals/guidelines-for-submission.aspx> PRIOR TO SUBMISSION. All article submissions will be forwarded to at least 3 members of the Editorial Review Board of the journal for double-blind, peer review. Final decision regarding acceptance/revision/rejection will be based on the reviews received from the reviewers. All submissions must be forwarded electronically.

All submissions and inquiries should be directed to the attention of:  
Francisco José García-Peñalvo, [JITR@igi-global.com](mailto:JITR@igi-global.com)

All manuscript submissions to JITR should be sent through the online submission system:
