Advanced Methodologies and Technologies in Library Science, Information Management, and Scholarly Inquiry

Part of the Advances in Library and Information Science Book Series

Mehdi Khosrow-Pour, D.B.A. (Information Resources Management Association, USA)

Description:
As the academic and scholarly landscape are continuously enhanced by the advent of new technology, librarians must be aware and informed to develop and implement best practices. Effective administration of libraries is a crucial part of delivering library services to patrons and ensuring that information resources are disseminated efficiently.

Advanced Methodologies and Technologies in Library Science, Information Management, and Scholarly Inquiry provides emerging information on modern knowledge management and effective means of sharing research through libraries. While highlighting the importance of digital literacy and information resources, readers will also learn new methods in information retrieval and research methods in quality scholarly inquiry. This book is an important resource for librarians, administrators, information science professionals, information technology specialists, students, and researchers seeking current information on the importance of effective library science technology.

Topics Covered:

- Academic Libraries
- Digital Libraries
- Digital Literacy
- Information Resources Management
- Information Technology
- Knowledge Management
- Library Science
- Research Methods
