Enhancing Knowledge Discovery and Innovation in the Digital Era

Part of the Advances in Knowledge Acquisition, Transfer, and Management Book Series

Miltiadis D. Lytras (The American College of Greece, Greece), Linda Daniela (University of Latvia, Latvia) and Anna Visvizi (The American College of Greece, Greece)

Description:
With the dawn of electronic databases, information technologies, and the Internet, organizations, now more than ever, have easy access to all the knowledge they need to conduct their business. However, utilizing and detecting the beneficial information can pose as a challenge.

Enhancing Knowledge Discovery and Innovation in the Digital Era is a vibrant reference source on the latest research on student education, open information, technology enhanced learning (TEL), and student outcomes. Featuring widespread coverage across a range of applicable perspectives and topics, such as engineering education, data mining, and 3D printing, this book is ideally designed for professionals, upper-level students, and academics seeking current research on knowledge management and innovation networks.

Topics Covered:
- Data Mining
- Digital Electronics Education and Design Suite (DEEDS)
- Innovation Networks
- Knowledge Management
- Learning Analytics
- Open Information
- Smart Education
- Student Outcomes
- Technology Enhanced Learning (TEL)
