Uncovering Essential Software Artifacts through Business Process Archeology

Premier Reference Source

Uncovering Essential Software Artifacts through Business Process Archeology

Part of the Advances in Business Information Systems and Analytics Book Series

Ricardo Perez-Castillo (University of Castilla-La Mancha, Spain) and Mario G. Piattini (University of Castilla - La Mancha, Spain)

Corporations accumulate a lot of valuable data and knowledge over time, but storing and maintaining this data can be a logistic and financial headache for business leaders and IT specialists.

Uncovering Essential Software Artifacts through Business Process Archaeology introduces an emerging method of software modernization used to effectively manage legacy systems and company operations supported by such systems. This book presents methods, techniques, and new trends on business process archeology as well as some industrial success stories. Business experts, professionals, and researchers working in the field of information and knowledge management will use this reference source to efficiently and effectively implement and utilize business knowledge.

Topics Covered:

- Data Mining
- Business Process Reengineering
- Business Process Management
- Enterprise Modeling
- Model-Driven Engineering
- Quality Assurance
- Business Process Improvement
- Strategic Knowledge Management
- Architecture-Driven Modernization
- Software Maintenance
