The **International Journal of Information Systems for Crisis Response and Management (IJISCRAM)** is an academically rigorous outlet for research into crisis response and management. It is focused on the design, development, implementation, use and evaluation of IS technologies and methodologies to support crisis response and management. It explores issues critical to the application of IS to crisis response and management. This journal covers all aspects of the crisis management information systems discipline, from organizational issues to technology support to decision support and knowledge representation. High quality submissions are encouraged using any qualitative or quantitative research methodology, focusing on the design, development, implementation, use, and evaluation of such systems.
