

Information System Modeling and Design (IJISMD)

ISSN: 1947-8186; EISSN: 1947-8194

Established 2010; Published Quarterly

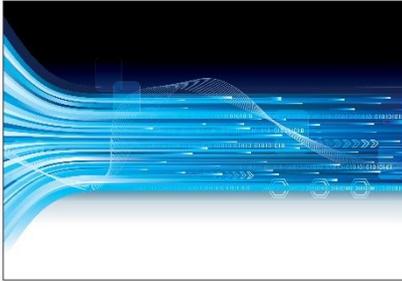

Editor(s)-in-Chief: Remigijus Gustas (Karlstad University, Sweden)

The **International Journal of Information System Modeling and Design (IJISMD)** publishes original research and practical results on the advances in system analysis and design. The journal promotes the emerging discipline of informatics and its research results on the methods of requirements engineering, enterprise system modeling, service design, integration, evolution, and implementation. This journal examines the theoretical foundations of new generation design tools, which facilitate reasoning regarding emerging compositions of services and bridging the communication gap among business managers and system designers. The primary goal of system modeling and design is to align business models with computerized services to make both organizational and technical system parts more effective.

An official publication of
the Information Resources
Management Association

INTERNATIONAL JOURNAL OF

Information System Modeling and Design

IGI PUBLISHING
Publisher of IT books, journals and cases since 1988

Individual Pricing

Print + Free E-Access: **\$275.00**

E-Access + Free Print: **\$275.00**

Institution Pricing

Print + Free E-Access: **\$765.00**

E-Access + Free Print: **\$765.00**

Topics Covered:

- Agent-oriented approaches
- Alignment of business processes with IT operations
- Business Process Modeling
- Component-oriented system design
- Conceptual modeling
- Data inconsistency and incompleteness control
- Data integrity
- Enterprise Interoperability
- Enterprise modeling and integration
- Information system architecture
- Information system methodologies
- Interaction design
- Knowledge representation
- Methods of system analysis and design
- Model-based verification and validation
- Model-driven project management
- Model-driven system development
- Object-oriented methods
- Ontologies and Semantic Web services
- Pragmatic aspects of system design
- Quality of design
- Semantic integrity of business process and data
- Separation of concerns in system design
- Service-oriented modeling
- System requirements engineering
- View integration and evolution

SUBMISSION INFORMATION

Prospective authors should note that only original and previously unpublished articles will be considered. INTERESTED AUTHORS MUST CONSULT THE JOURNAL'S GUIDELINES FOR MANUSCRIPT SUBMISSIONS at <http://www.igi-global.com/journals/guidelines-for-submission.aspx> PRIOR TO SUBMISSION. All article submissions will be forwarded to at least 3 members of the Editorial Review Board of the journal for double-blind, peer review. Final decision regarding acceptance/revision/rejection will be based on the reviews received from the reviewers. All submissions must be forwarded electronically.

All submissions and inquiries should be directed to the attention of:
Remigijus Gustas, ijismd@kau.se

All manuscript submissions to IJISMD should be sent through the online submission system:
<http://www.igi-global.com/authorseditors/titlesubmission/newproject.aspx>

EDITOR-IN-CHIEF BIO

Remigijus Gustas is a full-time professor in the Department of Information Systems at Karlstad University (Sweden). He is the head of the research group on enterprise and system architecture design. Remigijus Gustas holds a diploma in system engineering (1979), a doctor (1986) and a docent (1991) in the area of information systems. In 1999, he was granted a habilitated doctor degree in the area of information system engineering. His main teaching subjects are system analysis and design, advances in information system modeling, object-oriented modeling, database systems, and enterprise modeling. Remigijus Gustas has been involved in a number of industrial and European information technology projects. Remigijus Gustas is a member of IFIP WG 8.1. He was leading projects in the area of enterprise modeling, service-oriented analysis and design, e-business modeling, and software technologies. Remigijus Gustas has acted as a reviewer of contributions for several journals. He was chairing and serving as a program committee member in a number of international conferences. Remigijus Gustas is the author of one monograph and more than eighty research publications. His research interests lie in the area of conceptual modeling, semantic and pragmatic aspects of service architectures, information system analysis and design, enterprise modeling and integration.
