Technology in Healthcare

A Collection of 19 Scholarly Titles

Healthcare is significantly affected by technological advancements, as technology both shapes and changes health information systems. However, it is important to consider the ethical, societal, and cultural implications that technology in healthcare may impose.

The Technology in Healthcare collection is an authoritative reference compilation that supports the continual development and transformation of medical technologies. This wide-ranging set of titles includes 19 scholarly texts focusing on healthcare information systems, smart healthcare applications, electronic medical records, and telehealth. These titles represent IGI Global’s unique coverage of the impact and effective use of technology within the healthcare and medical fields.

Three Convenient Purchasing Options:

- **Print:** $2,620
  - Regular List Price: $4,365
  - 978-1-61350-210-5

- **E-Book:** $3,920
  - Regular List Price: $6,530
  - 978-1-61350-211-2

- **Print/E-Book:** $5,240
  - Regular List Price: $8,730
  - 978-1-61350-212-9

*E-book access is available on a perpetual basis and includes all features of IGI Global’s advanced platform. To learn more about IGI Global’s platform, visit www.igi-global.com/eresources.

Human-Centered Design of E-Health Technologies: Concepts, Methods and Applications
Martina Ziefle (RWTH Aachen University, Germany), et al.
A holistic introduction into the area of human-centered design for e-health applications.

Smart Healthcare Applications and Services: Developments and Practices
Carsten Röcker (RWTH Aachen University, Germany), et al.
Provides an in-depth introduction into medical, social, psychological, and technical aspects of smart healthcare applications.

Healthcare Delivery Reform and New Technologies: Organizational Initiatives
Matthew Guah (Clifton University, USA).
Contains cross-disciplinary research on strategic initiatives for healthcare reform that impacts not only patients, but also organizations.

Wireless Technologies for Ambient Assisted Living and Healthcare: Systems and Applications
Athina Lazakidou (University of Peloponnese, Greece), et al.
Provides a compendium of terms, definitions, and explanations of concepts and processes within the area of AAL.

E-Health Systems Quality and Reliability: Models and Standards
Anastasius Mountzouglou (European Society for Quality in Healthcare, Greece), et al.
Addresses healthcare systems and presents a novel framework for revealing, understanding, and implementing appropriate management interventions leading to qualitative improvement.

Development in Healthcare Information Systems and Technologies: Models and Methods
Joseph Tan (McMaster University, Canada)
Presents the latest research in healthcare information systems design, development, and deployment.

Handbook of Research on Human Cognition and Assistive Technology: Design, Accessibility and Transdisciplinary Perspectives
Soonwha Seok (University of Wisconsin-Whitewater, USA), et al.
Marks a critical milestone in the history of implementation and practice of assistive technology.

Healthcare and the Effect of Technology: Developments, Challenges and Advancements
Stefane M. Kabene (Ecole des Hautes Etudes en Santé Publique, France)
Presents the perspective of a distinct form of e-health that is patient-focused, patient-aware, and patient-active.

Pervasive and Smart Technologies for Healthcare: Ubiquitous Methodologies and Tools
Antonio Coronato (CNR, Italy), et al.
Offers solutions for the pressures within today's healthcare systems.

Creating Knowledge-Based Healthcare Organizations
Nilmini Wickramasinghe (Cleveland State University, USA), et al.
Includes the methodologies, systems, and approaches needed to create and manage knowledge in various types of healthcare organizations.

Handbook of Research on Developments in E-Health and Telemedicine: Technological and Social Perspectives
Maria Manuela Cunha (Politecnico Institute of Cavado and Ave, Portugal), et al.
Addresses the main issues, challenges, opportunities, and trends related to the fields of online health and medical study.

Text Mining Techniques for Healthcare Provider Quality Determination: Methods for Rank Comparisons
Patricia Cerrito (University of Louisville, USA)
Defines patient severity indices for risk adjustments and comparison of patient outcomes to assess quality factors.

Redesigning Innovative Healthcare Operation and the Role of Knowledge Management
M. Saito (Waseda University, Japan), et al.
Provides comprehensive frameworks, constraints, and performances analyzed by experts within the healthcare sector.

Handbook of Research on Advances in Health Informatics and Electronic Healthcare Applications: Global Adoption and Impact of Information Communication Technologies
Khalil Khoubati (University of Sindh, Pakistan), et al.
Sheds light on the adoption and usage of health informatics.

Patient-Centered E-Health
E. Vance Wilson (Arizona State University, USA)
Offers an evidence-based management approach to issues associated with the human and social aspects of health information systems.

Information Systems and Healthcare Enterprises
Roy Rada (University of Maryland Baltimore County, USA)
Provides insight on the challenges arising from the adaptation of information systems to the healthcare industry.

Web Mobile-Based Applications for Healthcare Management
Laflit Al-Haxim (University of Southern Queensland, Australia)
Addresses the difficult task of managing admissions and waiting lists while ensuring a quick and convincing response to unanticipated changes of clinical needs.

E-Health Systems Diffusion and Use: The Innovation, the User and the UseIT Model
Ton A. M. Spil (University of Twente, The Netherlands), et al.
Offers an overview of the use and diffusion of information systems in the healthcare sector with particular attention to the role of the user.
