Collaborative and Virtual Work
A Collection of 19 Scholarly Titles

There has been a dramatic shift in the way that individuals carry out their job responsibilities. With recent technological advancements and increased globalization, organizations now expect employees to work both collaboratively and virtually.

The Collaborative and Virtual Work collection is a specialized reference compilation that supports research in the fields of e-collaboration and business technologies. This premier package includes 19 scholarly titles focusing on distributed teams, virtual communities, the collaborative Web, and trust in virtual environments. These titles represent IGI Global’s unique coverage of the impact and effective use of technology in human aspects of business.

Three Convenient Purchasing Options:

Print: $2,355

Business Organizations and Collaborative Web: Practices, Strategies and Patterns
Karma Malik (U21 Global, India), et al.
Delves deeper into identifying specific business processes and their linkage with the collaborative Web.

Distributed Team Collaboration in Organizations: Emerging Tools and Practices
Kathy L. Milhauser (George Fox University, USA)
Summarizes the challenges inherent in leading distributed teams and explores emerging practices to optimize distributed team performance.

Technology for Creativity and Innovation: Tools, Techniques and Applications
Anabela Mesquita (ISCAP, Portugal)
Provides empirical research findings and best practices on creativity and innovation in business, organizational, and social environments.

Technologies for Supporting Reasoning Communities and Collaborative Decision Making: Cooperative Approaches
John Yearwood (University of Ballarat, Australia), et al.
Includes chapters from diverse fields of inquiry including decision science, political science, argumentation, and knowledge management.

Communication, Relationships and Practices in Virtual Work
Shawn Long (The University of North Carolina-Charlotte, USA)
Characterizes the nuanced communication, relational, and practical dynamics that characterize virtual working in contemporary organizations.

E-Collaborative Knowledge Construction: Learning from Computer-Supported and Virtual Environments
Bernhard Ertl (Universitat der Bundeswehr München, Germany)
Explores the construction of beneficial e-collaborative knowledge environments.

Virtual Collaborative Writing in the Workplace: Computer-Mediated Communication Technologies and Processes
Beth Hewett (Defend and Publish, USA), et al.
Investigates the use of computer-mediated communication technologies.

Handbook of Research on Electronic Collaboration and Organizational Synergy (2 Vols.)
Janet Salmons (Vision2lead, Inc. and Capella University, USA), et al.
Offers exhaustive research on collaborations in education, business, and government and social sectors.

Emerging Technologies for Semantic Work Environments: Techniques, Methods, and Applications
Jörg Rech (Fraunhofer Institute for Experimental Software Engineering, Germany), et al.
An overview of the emerging field of Semantic Work Environments.

Handbook of Research on Virtual Workplaces and the New Nature of Business Practices
Pavel Zemliansky (James Madison University, USA), et al.
Covers the issues surrounding the influx of information technology to the office environment, and from choice and effective use of technologies to necessary participants in the virtual workplace.

E-Collaboration in Modern Organizations: Initiating and Managing Distributed Projects (3 Vols.)
Ned Kock (Texas A&M International University, USA)
Offers research related to e-collaboration in modern organizations.

Higher Creativity for Virtual Teams: Developing Platforms for Co-Creation
Steven P. MacGregor (University of Girona, Spain), et al.
Presents advanced research on the concept of creativity using virtual teams, demonstrating a specific focus and application for virtual teams.

Knowledge and Technology Management in Virtual Organizations: Issues, Trends, Opportunities and Solutions
Goran D. Putnik (University of Minho, Portugal), et al.
Presents recent contributions in the areas of organization, knowledge, and technology management in the context of virtual enterprises.

Managing IT Professionals in the Internet Age
Pak Yoong (Victoria University of Wellington, New Zealand), et al.
Explores the impact that the Internet has had on such phenomena as electronic commerce, outsourcing and offshoring, new styles of programming and system development, virtual work, virtual communities, and real-time communications.

Business Process Improvement Through E-Collaboration: Knowledge Sharing Through the Use of Virtual Groups
Ned Kock (Texas A&M International University, USA)
Discusses key findings in connection with effects of e-collaboration technologies on business process improvement groups.

Working Virtually: Challenges of Virtual Teams
Robert Jones (Enterprise Architecture Group of HP Corporate IT, USA), et al.
Provides an in-depth, practical perspective on the growing dependence of virtual teams and how to best exploit them.

Electronic Monitoring in the Workplace: Controversies and Solutions
John Weckert (Centre for Applied Philosophy and Public Ethics & Charles Sturt University, Australia)
Contributes to the debate surrounding the rights of employees vs. the monitoring of employees by employers, and points toward some viable solutions.

Internet-Based Workplace Communications: Industry and Academic Applications
Kirk St.Amant (James Madison University, USA), et al.
Examines the different ways in which online media are becoming a part of and affecting educational and professional writing practices.

E-Collaborations and Virtual Organizations
Michelle W.L. Fong (Victoria University, Australia)
Covers a broad range of topics, from underlying technological structures to fundamental mechanisms that are relevant to e-collaboration and virtual organizations.
