Virtual Learning Environments

A Collection of 18 Scholarly Titles

With teaching and learning tools designed to enhance students' learning experience, online education has become more common in the classroom environment.

The Virtual Learning Environments collection is a valuable set of 18 scholarly titles covering topics on education technology, virtual learning environments, adult learning, distance education, and much more. These titles embody IGI Global's wide-ranging coverage on the rapidly evolving field of virtual learning environments in the contemporary classroom.

Three Convenient Purchasing Options:

Print: $1,935
Regular List Price: $2,580
978-1-4666-1661-5

E-Book:* $2,870
Regular List Price: $3,825
978-1-4666-1662-2

Print/E-Book:* $3,870
Regular List Price: $5,160
978-1-4666-1663-9

*E-book access is available on a perpetual basis and includes all features of IGI Global's advanced platform. To learn more about IGI Global's platform, visit www.igi-global.com/eresources.

Physical and Virtual Learning Spaces in Higher Education: Concepts for the Modern Learning Environment
Mike Keppell (Charles Sturt University, Australia), et al.  
Documents real world experiences of innovators in higher education who have redesigned spaces for learning and teaching.

Multi-User Virtual Environments for the Classroom: Practical Approaches to Teaching in Virtual Worlds
Giovanni Vincenti (Towson University, USA), et al.  
Highlights the work of educators daring enough to teach in these digital frontiers. Instructors will find cutting-edge teaching ideas in the theoretical discussions, case studies, and experiments presented in this book.

Virtual Immersive and 3D Learning Spaces: Emerging Technologies and Trends
Shalin Hai-Jew (Kansas State University, USA)  
This reference helps push the conceptual and applied boundaries of virtual immersive learning.

Teaching through Multi-User Virtual Environments: Applying Dynamic Elements to the Modern Classroom
Giovanni Vincenti (Towson University, USA), et al.  
A must-read for all educators and practitioners, of any subject and at any level, who wish to incorporate a dynamic online element to their classroom.

Cases on Interactive Technology Environments and Transnational Collaboration: Concerns and Perspectives
Siran Mukerji (IGNOU, India), et al.  
Provides a comparative and comprehensive analysis of technologically enabled educational environments and various issues concerning education and collaborations across the world.

Technologies and Practices for Constructing Knowledge in Online Environments: Advancements in Learning
Mike Keppell (Charles Sturt University, Australia), et al.  
Documents real world experiences of innovators in higher education who have redesigned spaces for learning and teaching.

Interaction in Communication Technologies and Virtual Learning Environments: Human Factors
Angela T. Ragusa (Charles Sturt University, Australia)  
Examines the effect of technological rationalism on communication and learning outcomes in a global, multi-cultural world.

Technology-Supported Environments for Personalized Learning: Methods and Case Studies
John O’Donoghue (University of Central Lancashire, UK)  
Explores the metaphor of anytime and anywhere individual education, as well as the idea of tailoring instruction to meet individual needs.

Cases on Collaboration in Virtual Learning Environments: Processes and Interactions
Donna Russell (University of Missouri at Kansas City, USA)  
Provides a systematic response to this highly innovative and rapidly evolving field for enhanced education and training.

Collective Intelligence and E-Learning 2.0: Implications of Web-Based Communities and Networking
Harrison Hao Yang (State University of New York, USA), et al.  
Includes a selection of world-class chapters addressing current research, case studies, best practices, pedagogical approaches, and strategies related to e-learning resources and projects.

Mark Stansfield (University of the West of Scotland, UK), et al.  
Documents real world experiences of innovators in higher education who have redesigned spaces for learning and teaching.

Computer-Supported Collaborative Learning: Best Practices and Principles for Instructors
Kara L. Orvis (Aptima Inc., USA), et al.  
Provides must-have information on the role of the instructor in computer-supported collaborative learning, real world perspectives on virtual learning group collaboration, and supporting learning group motivation.

Managing Learning in Virtual Settings: The Role of Context
Antonio Dias de Figueiredo (University of Coimbra, Portugal), et al.  
Stresses the dimension of context in a world dominated by a focus on the dimension of content while explaining the development of balanced, organic, and successful learning environments and strategies.

Designing Distributed Learning Environments with Intelligent Software Agents
Fuhua Lin (Athabasca University, Canada)  
Offering new and interesting research issues surrounding the development of distributed learning environments in the Semantic Web age.

Interactive Multimedia in Education and Training
Sanjaya Mishra (Indira Gandhi National Open University, India), et al.  
Discusses issues related to the planning, designing, and development of interactive multimedia in a persuasive tone and style, offering rich research data.

Development and Management of Virtual Schools: Issues and Trends
Catherine Cavanaugh (University of North Florida, USA)  
Brings together knowledge of virtual schools as a reference for scholars and other groups involved in virtual schools.

Online Collaborative Learning: Theory and Practice
Tim S. Roberts (Central Queensland University, Australia)  
Provides a resource for researchers and practitioners in the area of online collaborative learning (also known as CSCL, computer-supported collaborative learning), particularly those working within a tertiary education environment.

The Knowledge Medium: Designing Effective Computer-Based Educational Learning Environments
Gary A. Berg (California State University, USA)  
Suggests that the understanding of computers as a medium may be a key to re-envisioning educational technology.
