Business Ethics, Data Analysis, and Decision Support

A Collection of 18 Scholarly Titles

Specifically designed to diffuse knowledge on effective methods and strategies for successful business practice and design, on subjects ranging from technology and the application of decision-making support systems, to data analysis and the ethics of business practice.

The Business Ethics, Data Analysis, and Decision Support collection includes 18 academic titles combined to create awareness among academicians and practitioners on the use of decision-making support systems, environments, and theories, as well as decision aids for business ethics and how ethics and business combine and react. This collection offers an invaluable resource for librarians, researchers, academics, and practitioners.

Integrates and Strategic Advancements in Decision Making Support Systems
Pascale Zarate (Toulouse University, France)

Decision Making Theories and Practices from Analysis to Strategy
Madjid Tavana (La Salle University, USA)
This work is comprised of sophisticated tools and methodologies developed by researchers and vendors to improve decision making for business strategy.

Dr. Rajagopal (Monterrey Institute of Technology and Higher Education, Mexico)
Describes a holistic approach to monitoring, evaluating, and applying appropriate marketing strategies, and understanding the competition and its future implication on the business of a company.

Data-Exchange Standards and International Organizations: Adoption and Diffusion
Josephine Wapakabulo Thomas (Rolls-Royce, UK)
A reference source written by an international collaboration of field experts, this book covers advanced topics such as product life cycle support, IT standardization, and innovation- and adoptor-centric data analysis.

Infonomics for Distributed Business and Decision-Making Environments: Creating Information System Ecology
Małgorzata Pankowska (Karol Adamiecki University of Economics in Katowice, Poland)
Provides greater understanding of issues, challenges, trends, and technologies effecting the overall utilization and management of information in modern organizations around the world.

Processing and Managing Complex Data for Decision Support
Jérôme Darmont (University of Lyon (ERIC Lyon 2), France, et al.
Provides readers with an overview of the emerging field of complex data processing by combining together various research studies and surveys in different subfields, and by highlighting the similarities between the different data, issues, and approaches.

Strategic Alignment Process and Decision Support Systems: Theory and Case Studies
Tamio Shimizu (Polytechnic School - University of São Paulo), et al.
Provides a visualization of the nature, scope, objectives and difficulties of the overall decision making process.

Guiseppe A. Forgione (University of Maryland - Baltimore County, USA), et al.
A comprehensive compilation of Decision-Making Support Systems thought and vision, dealing with issues such as decision making concepts in organizations.

Enterprise Information Systems and Advancing Business Solutions: Emerging Models
Madjid Tavana (La Salle University, USA)
Provides comprehensive coverage and understanding of various enterprise information systems (EIS) such as enterprise resource planning (ERP) and electronic commerce.

Handbook of Research on Teaching Ethics in Business and Management Education
Charles Wankel (St. John's University, USA), et al.
Addresses lessons learned from the most recent business corruption scandals and financial crises, and also questions what we're teaching now and what should be considered in educating future business leaders.

Ethical Issues in E-Business: Models and Frameworks
Daniel E. Palmer (Kent State University, USA)
Offers audiences a diverse and global perspective concerning the ethical consequences of e-business transactions, e-commerce applications, and technological advancements in secure online use.

Contemporary Theory and Pragmatic Approaches in Fuzzy Computing Utilization
Toly Chen (Feng Chia University, Taiwan)
This premier reference source focuses on up-to-date theoretical views of fuzzy computing while highlighting empirical approaches useful to real world utilization.

Exploring Advances in Interdisciplinary Data Mining and Analytics: New Trends
David Taniar (Monash University, Australia), et al.
An updated look at the state of technology in the field of data mining and analytics.

Business Data Communications and Networking: A Research Perspective
Jairo Gutierrez (University of Auckland, NZ)
Covers a series of technical advances in the field while highlighting their respective contributions to business or organizational goals, and centers on the issues of network-based applications, mobility, wireless networks, and network security.

Web-Based Multimedia Advancements in Data Communications and Networking Technologies
Varadhajaran Sridhar (Sasken Communication Technologies), et al.
Highlights comprehensive research which will enable readers to understand, manage, use, and maintain business data communication networks more effectively.

Data Mining Applications for Empowering Knowledge Societies
Hakikur Rahman (University of Minho, Portugal)
Presents an overview on the main issues of data mining, including its classification, regression, clustering, and ethical issues.

Organizational Data Mining: Leveraging Enterprise Data Resources for Optimal Performance
Hamid Nemati (The University of North Carolina at Greensboro, USA), et al.
Demonstrates how organizations can leverage ODM for enhanced competitiveness and optimal performance.

Online Instruments, Data Collection, and Electronic Measurements: Organizational Advancements
Mihai C. Bocarnea (Regent University, USA), et al.
Provides a strong focus on organizational leadership instruments while combining them with practical and ethical issues associated with online data collection. Such a combination makes this a unique contribution to the field.
