

## Guest Editorial Preface

# Special Issue Cyber Security and Privacy in Communication Networks (Part 2)

C. P. Gupta, Rajasthan Technical University, Kota, India

Nishtha Kesswani, Central University of Rajasthan, Ajmer, India

It is a great matter of pleasure for us to bring this second part of special issue of “*International Journal of Cyber Security and Privacy (IJISP)*” covering the six relevant papers of “International Conference on Cyber Security (ICCS) 2016” that was organized in Kota (Rajasthan) India on August 13-14, 2016:

1. A Proposed Scheme for Remedy of Man-In-The-Middle Attack on Certificate Authority
2. Identification of Cryptographic Vulnerability and Malware Detection in Android
3. Localization in Wireless Sensor Networks Using Soft Computing Approach
4. Malware Detection by Static Checking and Dynamic Analysis of Executable
5. A Secure Cloud Storage using ECC-Based Homomorphic Encryption
6. HoneyPot Baseline for Zero Day Attack Detection

The papers presented in the ICCS 2016 went through strict refereeing and examination resulting in a current rejection rate of 57.6%. We are delighted to say that this is in no small part due to the hard work the editorial board and reviewers, in not only refereeing the papers submitted but raising the standard of the quality of papers that we will publish.

Last but not the least, as the guest editor of ICCS 2016 submissions, we are thankful to people who have worked with us in planning and organizing both technical arrangements. In particular, we are thankful to program chairs for their support; the program committee for their timely reviewing of papers.

Hope that the quality research work published in this issue will be able to serve something new to Humanity and Science.

*C. P. Gupta*
