Editorial Preface

Special Issue on Computers for Management for Journal of Global Information Management

C. P. Gupta, Central University of Rajasthan, Jaipur, India

Nishtha Kesswani, Central Univeristy of Rajasthan, Jaipur, India

It is a great matter of pleasure for us to bring this special issue of "Journal of Global Information Management (JGIM)" covering the following FIVE relevant papers of "International Conference on Computers and Management (ICCM) 2016" that was organized in Rajasthan Technical University, Kota (Rajasthan) India on December 28-29, 2016:

Resource Request Based Energy Efficient Heuristic for Server Offloading in Cloud Computing Environment

News Sentiment Incorporation in Real-Time Trading: Alpha Testing the Event Trading Strategy in HFT

AR using NUI based Physical Therapy Rehabilitation Framework with Mobile Decision Support System: A Global Solution for Remote Assistance

Healthcare Systems and Corporate Social Responsibility Communication: A Comparative Analysis between Malta and India

E-Marketing Strategies for Islamic Banking - A Case based study

The articles presented in the ICCM 2016 went through strict refereeing and examination resulting in a current rejection rate of 59.2%. We are delighted to say that this is in no small part due to the hard work the editorial board and reviewers, in not only refereeing the papers submitted but raising the standard of the quality of papers that we will publish.

Last but not the least, as the guest editor of ICCM 2016 submissions, we are thankful to people who have worked with us in planning and organizing both technical arrangements. In particular, we are thankful to program chairs for their support; the program committee for their timely reviewing of papers.

Hope that the quality research work published in this issue will be able to serve something new to Humanity and Science.
