Table of Contents

Preface ................................................................................................................................................... x

Acknowledgment ............................................................................................................................. xviii

Chapter 1
Nature-Inspired Intelligence in Supply Chain Management: A Review of Selected Methods and Applications........................................................................................................................................... 1
  Vassilios Vassiliadis, University of the Aegean, Greece
  Georgios Dounias, University of the Aegean, Greece

Section 1
Synthesis and Design of Supply Chain

Chapter 2
Coalitional Added Services in a Linear Neutral e-Marketplace: An Approach Based on the Shapley Value........................................................................................................................................... 33
  Paolo Renna, University of Basilicata, Italy
  Pierluigi Argoneto, University of Basilicata, Italy

Chapter 3
Investing in Excess Capacity: Combining Real Options and Fuzzy Approaches in a Co-Competitive Network........................................................................................................................................... 51
  Pierluigi Argoneto, University of Basilicata, Italy
  Paolo Renna, University of Basilicata, Italy

Chapter 4
Optimal Design and Operation of Supply Chain Networks under Demand Uncertainty .............. 73
  Michael C. Georgiadis, University of Western Macedonia, Greece
  Pantelis Longinidis, University of Western Macedonia, Greece
Section 2
Planning in Large Supply Chains

Chapter 5
A Computational Intelligence Approach to Supply Chain Demand Forecasting
Nicholas Ampazis, University of the Aegean, Greece

Chapter 6
Generating Supply Chain Ordering Policies using Quantum Inspired Genetic Algorithms and Grammatical Evolution
Seán McGarraghy, University College Dublin, Ireland
Michael Phelan, University College Dublin, Ireland

Chapter 7
Quantitative Risk Management Models for Newsvendor Supply Chains
Dimitrios Vlachos, Aristotle University of Thessaloniki, Greece

Chapter 8
Relief Distribution Networks: Design and Operations
Soumia Ichoua, Johnson C. Smith University, USA

Section 3
Supply Chain Operations

Chapter 9
An Analytical Model to Estimate the Optimum Production Rate of Picking Processes in a Modular Warehouse Environment
Dimitrios M. Emiris, University of Piraeus, Greece
Athanasios Skarlatos, University of Piraeus, Greece

Chapter 10
Constrained Optimization of JIT Manufacturing Systems with Hybrid Genetic Algorithm
Alexandros Xanthopoulos, Democritus University of Thrace, Greece
Dimitrios E. Koulouriotis, Democritus University of Thrace, Greece

Chapter 11
Multi-Period Routing in Hybrid Courier Operations
Theodore Anthanasopoulos, University of the Aegean, Greece
Ioannis Minis, University of the Aegean, Greece
Chapter 12
Dynamic Travel Time Estimation Techniques for Urban Freight Transportation
Networks Using Historical and Real-Time Data ................................................................. 252
Vasileios Zeimpekis, University of the Aegean, Greece

Compilation of References ............................................................................................... 274

About the Contributors ..................................................................................................... 310

Index .................................................................................................................................. 315
