Information Modeling in the New Millennium

Table of Contents

Preface ......................................................................................................................... i

Section One: Foundations

Chapter 1
Information Modeling in the Internet Age—Challenges, Issues and Research Directions ................................................................. 1
  Keng Siau, University of Nebraska-Lincoln, Lincoln, USA
  Matti Rossi, Helsinki School of Economics, Finland

Chapter 2
Coherent, Consistent and Comprehensive Modeling of Communication, Information, Action and Organization ...................... 9
  Jan Dietz, Delft University, The Netherlands

Chapter 3
Toward an Autopoietic Approach for Information Systems Development ................................................................. 34
  El-Sayed Abou-Zeid, Concordia University, Canada

Chapter 4
Conceptual Modeling Process and the Notion of a Concept ............ 53
  Pramila Gupta, Central Queensland University, Australia
  James A. Sykes, Swinburne University of Technology, Australia

Section Two: Language and Ontological Perspectives

Chapter 5
A Genre-Based Method for Information Systems Planning ............. 70
  Tero Päivärinta, Veikko Halttunen and Pasi Tyrväinen
  University of Jyväskylä, Finland

Chapter 6
A Language/Action Based Approach to Information Modeling ........ 94
  Paul Johannesson, Stockholm University, Sweden
Chapter 7
Business Action and Information Modeling —
The Task of the New Millennium .............................................. 110
Pär Ågerfalk, Örebro University, Sweden
Göran Goldkuhl, Linköping University, Sweden

Chapter 8
An Environment for Managing Enterprise Domain Ontology .......... 137
Zhan Cui, Michael Cox and Dean Jones
Intelligent Business Systems Research, UK

Section Three: Object Oriented Modeling and its Extensions

Chapter 9
Integrating Fact-Oriented Modeling with
Object-Oriented Modeling .................................................. 150
Terry Halpin, Microsoft Corporation, USA

Chapter 10
On the Convergence of Analysis and Design Methods for
Multi-Agent, Component-Based and Object-Oriented Systems ...... 167
Bernard Moulin, Laval University, Canada

Chapter 11
An Information Management Environment Based on the
Model of Object Primitives ..................................................... 189
Nektarios Georgalas, BT Labs, UK

Chapter 12
Mapping UML Techniques to Design Activities ....................... 199
Ashley Bush and Sandeep Purao
Georgia State University, USA

Chapter 13
Information System Design Based on Reuse of
Conceptual Components .......................................................... 219
P. Bertolazzi, M.G. Fugini and B. Pernici
IASI-CNR, Milano

Section Four: Applied Information Modeling

Chapter 14
A Unifying Translation of Natural Language Patterns
to Object and Process Modeling .............................................. 231
Alexandra Galatescu, National Institute for R&D in
Informatics, Romania
Chapter 23
Modeling of Customers’ Ineractive Control of Service Processes .... 406
Heiko Ludwig
IBM Research, Zurich Research Laboratory, Switzerland

Chapter 24
Conceptual Web Site Modeling ......................................................... 427
Bernhard Strauch and Robert Winter
University of St. Gallen, Switzerland

Chapter 25
Audience-Driven Web Design .......................................................... 442
Olga De Troyer, Vrije Universiteit Brussel, Belgium

Chapter 26
Object-Oriented Web Applications Modeling ................................... 463
Gustavo Rossi, LIFIA-UNLP, La Plata, Argentina
Daniel Schwabe, PUC-Rio, Brazil

Chapter 27
A Systematic Relationship Analysis for Modeling
Information Domains ................................................................. 485
Jonhee Yoo, Rutgers University, USA
Michael Bieber, New Jersey Institute of Technology, USA

Author Biographies ................................................................. 502

Index ................................................................. 511
