About the Authors

Robert Bignall holds a B.Sc. and Ph.D. from the Flinders University of South Australia and postgraduate diplomas in Computer Science and Further Education from the University of Adelaide and the University of South Australia. He worked in education and as an IT consultant before joining academia. He was the foundation Head of the Gippsland School of Computing and Information Technology at Monash University and also serves as the Executive Director of the Monash Centre for Electronic Commerce. He was recently appointed as Pro Vice-Chancellor of Monash University’s Malaysian campus and will take up this role in the year 2000. His research interests include multiple-valued logic, multimedia technologies and electronic commerce enabling technologies.

Lois Burgess is a lecturer in the School of Information Technology and Computer Science at the University of Wollongong teaching IT Strategic Planning and Business Online to Masters and fourth year students. She holds an Honours degree in Information and Communication Technology from the University of Wollongong. Ms. Burgess’s research interests include strategic planning for IT, electronic commerce and service quality within the electronic trading environment. Prior to joining the University she worked for 20 years in the Australian Public Sector in Administration Management, Personnel, and training and Development. During this period she also held a number of high-level elected positions.

Joan Cooper is the foundation Professor of Technology at the University of Wollongong, and the first female professor in IT in Australia. She is Head of the School of Information Technology and Computer Science, and has over twenty years’ experience within the information technology field. She is also coordinator of the Secure Electronic Commerce Research group. Her most recent work is in Electronic Commerce and Health Informatics. She has expertise in electronic commerce, IT privacy and security issues, the impact of the Internet on society and the application of IT to the health sector. She has just been appointed to the NSW Privacy Advisory Committee, established as part of the NSW Government’s Privacy and Personal Information Protection Act 1998. She is one of the three founders of Australia’s first inter-University Electronic Commerce research and consulting group CollECTeR (Collaborative Electronic Commerce Technology and Research).

Head of the IPR Department at the Center of Research in Computer and Law (University of Namur- Belgium), Séverine Dusollier has a law degree and works in e-commerce and intellectual property rights. She has been involved in the European COPEARMS project on Electronic Copyright Management Systems and in the ECLIP Project on the legal issues of e-commerce. Séverine Dusollier is preparing a Ph.D. on the “Technical means of copyright protection”. She has published several articles on electronic commerce and on copyright matters. She is also a member of the International Association
of Science and Technology for Development (IASTED) and of the Belgian Copyright Association.

Assafa Endeshaw graduated from London University in intellectual property policy and technology-related legal disciplines such as information technology and transfer of technology laws as well as in international trade and franchising. He was previously a legal attorney and advisor in government departments and a legal researcher and consultant in a law firm in Ethiopia. Dr. Assafa has written several articles and conference papers that have appeared in local and international publications. He has authored Intellectual Property Policy for Non-Industrial Countries (Dartmouth, 1996), Intellectual Property in China: The Roots of the Problem of Enforcement (Acumen, 1996) and (jointly) Marketing and Consumer Law in Singapore (1999). His areas of interest are: intellectual property, information technology (including regulation of the Internet and E-Commerce), international trade law, franchising law, transfer of technology law, consumer protection law and law and development. Currently, he is an Associate Professor of law at the Nanyang Business School of the Nanyang Technological University, Singapore.

Mariam Fergusson is a senior lecturer in the School of Computer Science, UNSW, at the Australian Defence Force Academy in Canberra. Her main areas of interest are in electronic commerce and telecommunications management. Her research has concentrated on public sector electronic commerce and on on-line payments. Over the last three years she has worked with the Australian Capital Territory government on various electronic commerce projects including Internet payment systems. Mariam has been in the information technology industry over the last 20 years and has evenly distributed the time between working as a consultant and being in the tertiary education sector.

David Gordon is a Professor of Management, has been affiliated with the University of Dallas as a faculty member of the Graduate School of Management since 1969. During this period, he has functioned in several management roles including that of Associate Dean. Currently, he serves as a Director of MBA Programs in Engineering and Industrial Management. Prior to receiving his doctorate in Industrial Engineering from the University of Oklahoma and joining GSM, Dr. Gordon held a broad range of industrial management positions.

Sheng-Uei Guan received his M.Sc. & Ph.D. from the University of North Carolina at Chapel Hill. He is currently an associate professor of the Electrical Engineering Department at National University of Singapore. Prof. Guan has also worked in a prestigious R&D organization for several years, serving as a design engineer, project leader, and manager. He has also served as a member on the R.O.C. Information & Communication National Standard Draft Committee. After leaving the industry, he joined Yuan-Ze University in Taiwan for three-and-a-half years. He served as deputy director for the Computing Center, and also as the chairman for the Department of Information & Communication Technology. Later he joined La Trobe University with the Department of Computer Science & Computer Engineering where he helped to create a new multimedia systems stream.

Thomas Gulledge is Professor of Public Policy and Engineering at George Mason University and Director of the Policy Analysis Center within the Institute of Public Policy.
He lectures in the areas of organizational informatics, electronic commerce, planning, engineering management, and enterprise integration.

**Liaquat Hossain** received a Bachelor of Business Administration (BBA) and MSc in Computer and Engineering Management in 1993 and 1995 from the Assumption University of Thailand. During 1995 to 1997, the Hossain was a PhD candidate at the School of Information Technology and Computer Science, The University of Wollongong, Australia. Chapter 6, partially based on Hossain’s Ph.D. thesis, is titled “The Formalisation of a National Telecommunications Strategic Planning Processes (NTSPP) for the Telecos: A Case Study of Telecommunications in Thailand”. The author was also invited to conduct some postdoctoral research at the Internet Telephony Interoperability Consortium (ITC), MIT-Center for Technology, Policy and Industrial Development (MIT-CTPID), Massachusetts Institute of Technology (MIT) in 1997. At present, the author is a lecturer at the Institute of Information and Mathematical Sciences of Massey University at Albany, Auckland, New Zealand. The following areas are the author’s current interest: information infrastructure and economic development; impact of technological innovation on communications industry; strategic IS/IT planning under environmental uncertainty; CSFs for investing in e-commerce projects; and, national strategy for New Zealand’s health information infrastructure development.

**Bill Hutchinson** is the Associate Head of Management Information Systems at Edith Cowan University in Western Australia. He has had over 20 years experience in information systems in the government sector, and the oil and finance industries. He has published numerous papers on system design and information warfare.

**Laetitia Rolin Jacquemyns** has a degree in law and is a researcher in e-commerce at the Center of research in Computer and Law (University of Namur- Belgium). She works particularly in electronic payments, financial issues, taxation and self-regulation fields. She has been involved in the European project TRANSIPOL on the use of NTIC in the transport sector in the ECLIP Project on the legal issues of e-commerce. She has written a number of articles about these topics.

**Robert Johnston** is a Senior Lecturer and Researcher at Monash University, Melbourne, Australia, and holds Bachelor of Science (Hons.), Master of Science, and Doctor of Philosophy degrees from Monash University. Before joining the University he consulted for many years in the areas of production and inventory management and other manufacturing systems. Since then his main research areas have been operations management, advanced supply chain systems, and electronic commerce. He has published in the *Journal of the Operational Research Society, Omega International Journal of Management Science, International Journal of Electronic Commerce*, and many conference proceedings. He can be contacted at robert.johnston@infotech.monash.edu.au.

**Boon-Chye Lee** is a senior lecturer in economics at the University of Wollongong. He holds degrees in Business Administration as well as a PhD from the Australian Graduate School of Management, University of New South Wales. His research interests include sovereign debt, small and medium enterprises, electronic commerce, and electronic money. His published work include articles in the *Asia-Pacific Journal of Management, Journal of*
Ronald M. Lee is currently Professor and Director of the Erasmus University Research Institute for Decision Information System (Euridis) in Rotterdam, the Netherlands. He is also a Research Fellow at the Wharton School, University of Pennsylvania. Previously, he was Associate Professor of Information Systems at the University of Texas at Austin, and earlier served as a research scholar at the International Institute for Applied Systems Analysis in Vienna, Austria, and as Visiting Professor of Management at the Universidade Nova de Lisboa, in Lisbon, Portugal. He has a Ph.D. in Decision Sciences (Wharton, University of Pennsylvania, 1980). Current research focuses on applications of artificial intelligence, Petri nets, and logic modeling to electronic commerce; including representations of electronic trade procedures for international, business-to-business commerce.

Andreas Mitrakas (andreas@globalsign.net) LL.B., University of Athens, 1990, LL.M., Queen’s University of Belfast, 1991, Ph.D., Erasmus University of Rotterdam, 1997, is Senior Legal Consultant at GlobalSign NV, (www.globalsign.net) a European Certification Authority and provider of Public Key Infrastructure products and services. A member of the Athens Bar Association he participates in the ETERMS WG of the International Chamber of Commerce and has authored numerous publications in electronic commerce and IT Law including the book Open EDI and Law in Europe, Kluwer Law International, 1997.

Teoh Kok Poh is a graduate student of the National University of Singapore. He is currently a smart card and IT consultant of SciNet Systems, a start-up system consulting firm. Before starting up SciNet Systems, Mr. Poh was the product development manager of a smart card company in Singapore. His team was actively involved in smart card-based product and system design, and engineering test for smart card. After that, he was transferred to manage the operations of a system integration company that was actively involved in design and integration of smart card and IT system, real-time system, computer networking and Internet applications.

M. A. Quaddus received his Ph.D. from the University of Pittsburgh, M.S. from University of Pittsburgh and Asian Institute of Technology, and B.S. from Bangladesh University of Engineering and Technology. His research interests are in decision support systems, group decision and negotiation support systems, multiple criteria decision Making, systems dynamics, business research methods and in the theories and applications of innovation diffusion processes. Dr. Quaddus has published in a number of journals including Technological Forecasting & Social Change, Socio-Economic Planning Sciences, Journal of OR Society, Interfaces, Engineering Optimization, Eng Costs & Production Economics, International Journal of Management, Computers & Education etc and contributed to several books/monographs. In 1996 he received the researcher of the year award from Curtin Business School. Currently he is an Associate Professor with the Graduate School of Business, Curtin University of Technology, Australia. Prior to joining Curtin Dr Quaddus was with the University of Technology-Sydney and with the National University of Singapore.
Syed M. Rahman is currently a Visiting Professor at North Dakota State University, Fargo USA on leave from Monash University, Australia. He is a senior faculty member at the Gippsland School of Computing and Information Technology of Monash University. He obtained his doctoral degree from Budapest Technical University in 1980. He was the head of the Department of Computer Science and Engineering of Bangladesh University of Engineering and Technology from 1986 to 1992. He supervised more than 30 research projects leading to post graduate degrees. He has published 90+ research papers. He has organized a number of international conferences and is on the program committee of a number of conferences. His main area of interest includes multimedia computing and communications, electronic commerce and security issues, image processing and retrieval, pattern recognition and distributed processing.

Mahesh S. Raisinghani is a faculty member and co-director of the E-Commerce MBA Program at the University of Dallas’ Graduate School of Management. He also serves as the director of research at the University of Dallas’ Center for Applied Information Technology. His primary areas of expertise are electronic commerce technology and management, strategic utilization and management of information systems, and the organizational impacts of emerging technologies. He is the chair of the Electronic Commerce track and a world representative for the International Resources Management Association, an active member of the Association of Information Systems, Decision Sciences Institute, and the International Association of Computer Information Systems. He has had numerous listings including the *Who’s Who in Information Systems*, *Who’s Who in the World* and *Who’s Who Among Students in American Universities and Colleges*. Dr. Raisinghani conducts seminars in e-commerce and global information systems for executives. Professor Raisinghani’s previous publications have appeared in the *Journal of Information Systems Management*, *International Journal of Information Management*, *International Journal of Materials and Product Technology*, *Journal of Electronic Commerce*, *Journal of Information Technology Theory and Application*, *Industrial Management and Data Systems*, *Electronic Commerce World*, *American Business Review*, *Minority Business News USA* and *Arthur Anderson’s KnowledgeSpace*. His chapters have been published in *Annals of Cases in Information Technology Management*, *Managing Web-Enabled Technologies Application and Management: A Global Perspective*, and *Healthcare Information Systems: Challenges of the Next Millennium*; and has proceedings published in several regional, national and international information systems conferences in Australia, Canada, Greece, Israel, Mexico, Puerto Rico, South America and the U.S. His seven years of professional experience in information systems has taken him to Canada, China, India, Japan, Mexico, Singapore, Thailand, and U.K.

Deshani Rodrigo is completing her Masters Degree at Monash University, Australia, in the area of electronic commerce. Her research interests include performance related issues in Web systems and evolving electronic commerce technologies, in particular agent-based architectures. Her current qualifications include a Bachelor of Commerce (First Class Honors) in Management Science and Information Systems, with a major in Operations Research from The University of Auckland, New Zealand. Deshani is presently working at Monash University, developing a course in the field of electronic commerce as well as teaching in the area of system modelling and simulation. Previously she has undertaken a
variety of consulting jobs and worked at The University of Auckland. “She may be reached at deshani.rodrigo@csse.monash.edu.au.

**Ruhul A Sarker** received his Ph.D. from DalTech (former TUNS), Dalhousie University, Halifax, Canada, and is currently a Lecturer in Operations Research / Management Science at the School of Computer Science, University of New South Wales, ADFA, Canberra, Australia. Before joining UNSW, Dr. Sarker worked with the Monash University, Victoria, and the Bangladesh University of Engineering and Technology, Dhaka. In his school, he is the coordinator for postgraduate program in Operations Research and Statistics. His main research interests are mathematical modelling, evolutionary optimization, and computers and operations research Applications to real world problems. His research papers have appeared in many international journals, which include *EJOR, JORS, AMM, IJIE, IJMS, MPT*, and *Computers in Industry*.

**Sen Sendjaya** recently completed his M.B.A. training at Monash Mount Eliza Business School, Monash University. He also holds a management degree from Seattle University. Apart from e-commerce, his other research interests are leadership, ethics, and organization learning. Prior to his MBA training, he worked in the industry as a middle manager as well as served as a part-time lecturer at the Faculty of Economics, Petra Christian University in Indonesia.

**Timothy K. Shih** is a Professor and Chairman of the Department of Computer Science and Information Engineering at Tamkang University, Taiwan, R.O.C. His research interests include multimedia computing, software engineering, and formal specification and verification. He was a faculty member of the Computer Engineering Department at Tamkang University in 1986. In 1993 and 1994, he was a part-time faculty member of the Computer Engineering Department at Santa Clara University. He was also a visiting professor at the University of Aizu, Japan in the summer of 1999. Dr. Shih received his B.S. and M.S. degrees in Computer Engineering from Tamkang University and California State University, Chico, in 1983 and 1985, respectively. He also received his Ph.D. in Computer Engineering from Santa Clara University in 1993. Dr. Shih has published about 170 papers and participated in many international academic activities. Dr. Shih has received many research awards, including Tamkang University research awards, NSC research awards (National Science Council of Taiwan), and the IIAS research award of Germany. He also received many funded research grants from NSC, from the Institute of Information Industry, Taiwan, and from the University of Aizu, Japan. Dr. Shih has been invited frequently to give talks at national and international conferences and research organizations. The contact address of Dr. Shih is Department of Computer Science and Information Engineering, Tamkang University, Tamsui, Taipei Hsien, Taiwan 251, ROC. E-mail: tshih@cs.tku.edu.tw, Fax: +886 2 26209749, Phone: +886 2 26215656 x2743, [http://www.mine.tku.edu.tw/chinese/teacher/tshih.htm](http://www.mine.tku.edu.tw/chinese/teacher/tshih.htm)

**Chee Kheong Siew** presently the director of the Information Communication Institute of Singapore. In recent years, he led the institute to focus on innovative projects like electronic commerce, distance learning and ATM-based multimedia communication systems. He looks forward to leading ICIS to fulfill his vision of a world-class institute in teaching, research and innovation in communication software systems and networks. His
research interests include electronic commerce, traffic shaping, neural networks and network performance.

**James E. Skibo** is currently an Adjunct Professor of Industrial Management at the University of Dallas. He holds a M.B.A. from the University of Dallas and is working on his doctorate degree at The Fielding Institute, Santa Barbara, CA. He is Director of Cooperative Advertising for the Army & Air Force Exchange Service in Dallas, Texas. His areas of expertise include business and industrial management, marketing management, and consulting.

**Rainer Sommer** is a member of the George Mason University research faculty. He is Associate Research Professor of Public Policy and Systems Engineering as well as the assistant director of the Policy Analysis Center of the George Mason University’s Institute of Public Policy. Dr. Sommer has consulted and lectured internationally in the field of Enterprise Resource Planning systems, Integrated EC\EDI, software requirement analysis, and Enterprise Integration.

**Marla Royne Stafford** is Associate Professor of Marketing at the University of North Texas in Denton, Texas. She holds the Ph.D. in Marketing from the University of Georgia, and has been noted as a leading contributor to the field of advertising. Dr. Stafford’s research has focused primarily on message and media effects in services advertising and the new media. Her current research investigates uses and gratifications of the World Wide Web and non-profit advertising.

**Thomas F. Stafford** is Visiting Assistant Professor of Information Systems at Texas Woman’s University in Denton, Texas. He holds the Ph.D. in Marketing from University of Georgia and is currently pursuing doctoral studies in Information Systems at the University of Texas-Arlington. He serves on the Editorial Review Boards of *Psychology & Marketing*, *Journal of Consumer Affairs*, and *Journal of Marketing Education*. His research involves understanding consumer motivations and decision making and motivations for commercial activity on the Internet.

**Peter A. Stanski** is completing his Ph.D. at Computer Science and Software Engineering, Monash University Australia, in the area of Mobile Agents, Networks, the World Wide Web and converging technologies. His other research interests include distributed systems, mobile computing, electronic commerce, telecommunication systems and systems administration. He holds a Bachelor of Computing degree with a first class honors from Monash University, and is a member of the IEEE. In the last 9 years Peter has served as a founder and a company director, a systems architect and developer, a video games programmer, analyst, consultant, contractor and lecturer. He can be reached at peter.stanski@csse.monash.edu.au.

**Ly Fie Sugianto** is a lecturer at the Gippsland School of Computing and Information Technology, Monash University. Her research projects in Electronic Commerce include the development of the Electronic Commerce Implementation Adviser (eCIA) and the Web site support for Internet Commerce. She has also coauthored a number of research publications in optimization techniques, Decision Support Systems and Fuzzy Mathematics. Prior to her
About the Authors

Upon her appointment at GSCIT, she was involved in extensive research within the Australian power industry.

**Charles Trappey** is Associate Dean, College of Management and Professor of Management Science at the National Chiao Tung University in Taiwan. His research interests are international marketing, consumer behavior and marketing aspects of electronic commerce.

**Amy Trappey** is Professor of Industrial Engineering and Engineering Management at the National Tsing Hua University in Taiwan. Her research interests are business-to-business electronic commerce, product data management, and CAD/CAM.

**Klaus Turowski** is assistant professor at the University of Magdeburg in the area of Business Information Systems. Prior to assuming his current position, he worked at the University of Münster. 1993 he received his Dipl.-Wi.-Ing. (diploma degree in Industrial Engineering and Management) at the University of Karlsruhe and 1997 his Dr. rer. pol. (Ph.D. in Business Information Systems) at the University of Münster. Since 1998 he is speaker of Working Group 5.10.3 Component-oriented Business Application Systems of German Informatics Society (GI) and co-founder of working group 5.5 E-Commerce. His main research interests are component-oriented software development and e-commerce techniques, especially XML/EDI and Web engineering.

**Matthew Warren** is a information systems lecturer at Deakin University (Department of Computing & Mathematics) (1998 +) and before that a Lecturer at the Plymouth Business School, UK (1996 - 1998). He obtained his PhD in Computer Security Risk Analysis at Plymouth University, UK (1996). He has published 40 refereed journal and conference papers. He is a member of Australian Standards Committee IT/12/4 Security Techniques and is the Australian Representative on IFIP 11 WG 11 - Security Management. He has also worked on several European Union Research projects including projects under the ADAPT, HTCA, INFOSEC and AIM schemes.

**Yang Yang** received his B. Eng. (Electrical) from the National University of Singapore. He is currently pursuing M. Eng. (Electrical) in the Department of Electrical Engineering at the National University of Singapore on a part-time basis. During his industrial attachment, he worked in the Information Security Group at the Institute of System Science (Singapore) on a Secure-Cash project. He went on to work to develop a smart-card-based SSL 3.0 package for the same organization. During this period, he is also involved in the development of S-One, a web-based payment solution using smart card. After his graduation from the University, Yang Yang works in the Development Bank of Singapore as an analyst/programmer.

**Xun Yi** is a visiting research fellow of Information Communication Institute of Singapore. In recent years, he has been working on electronic commerce research area. His main research interests center in applying software agent technologies along with cryptographic technologies to solve issues faced by electronic commerce. So far, he has published papers in this area in international journals and conferences.
