

About the Authors

Panagiotis Kanellis (kanellis@bcs.org) is currently a project director with Information Society S.A. in Athens, Greece. Previous to that, he held senior consulting positions with Arthur Andersen and Ernst and Young. He was educated at Western International University in business administration (BS), at the University of Ulster in computing and information systems (post-graduate diploma), and at Brunel University in data communication systems (MS) and information systems (PhD). He is a research associate in the department of informatics and telecommunications at the National and Kapodistrian University of Athens and an adjunct faculty member at the Athens University of Economics and Business. Dr Kanellis has published more than 50 papers in international journals and conferences. He serves on the board of the Hellenic Chapter of the Association of Information Systems (AIS) and is a member of the British Computer Society (BCS) and a chartered information technology professional (CITP). He is also a certified information systems auditor (CISA).

Evangelos Kiountouzis is professor *emeritus* of information systems with the Department of Informatics of the Athens University of Economics & Business, Greece. He studied mathematics at the University of Athens and received a PhD in informatics from the University of Ulster, UK. His professional and research interests focus on information systems analysis and design methodologies and information systems security management. He has published numerous papers in international conferences and journals including the *Computer Journal*, *Computers & Security*, *Information Management* and *Computers Security*. He is the author of several books on the topics of information systems and information systems security management.

Nicholas Kolokotronis is currently a visiting professor with the Department of Computer Science and Technology, University of Peloponnese, Greece. He received a BS in mathematics from the Aristotle University of Thessaloniki, an MSc in computer science, and a PhD in cryptography from the National and Kapodistrian University of Athens. He has been a consultant for private companies and public organizations (ministries,

regulatory authorities), focusing in the design of security solutions for e-government and e-procurement applications, as well as, in the analysis of e-commerce technological and legal framework. He has published several articles on cryptography and systems security in international journals and conferences. Among others, his research interests include cryptography, combinatorial theory, error correcting codes, finite field theory, electronic commerce, network security protocols, Web services, public key infrastructures, and digital forensics.

Drakoulis Martakos is an associate professor with the Department of Informatics and Telecommunications at the National and Kapodistrian University of Athens, Greece. He received a BS in physics, an MS in electronics and radio communications, and a PhD in real-time computing from the same university. Professor Martakos is a consultant to public and private organizations and a project leader in numerous national and international projects. He is the chairman of the Hellenic Chapter of the Association of Information Systems (AIS) and he is the author or co-author of more than 70 scientific publications and a number of technical reports and studies.

* * * *

Sos S. Agaian is distinguished professor (The Peter T. Flawn Professor), College of Engineering, University of Texas at San Antonio (USA) and an adjunct professor with the Department of Electrical Engineering, Tufts University, Medford, Massachusetts. He has written more than 300 scientific papers (more than 100 refereed journal papers), four books, six book chapters, and has 12 patents. He is an associate editor of the *Journal of Real-Time Imaging*, the *Journal of Electronic Imaging*, and an editorial board member of the *Journal Pattern Recognition and Image Analysis*. His current research interests lie in the broad area of signal/image processing and transmission, information security, quantum signal processing, and communication.

Michael A. Caloyannides earned a PhD in electrical engineering, applied mathematics, and philosophy from the California Institute of Technology (Caltech) in 1972. After 14 years as senior scientist at Rockwell Int'l Corp., he worked for 13 years as chief scientist for an agency of the U.S. Government where he won the "Scientist of the Year" award. Since 1999, he has been senior fellow at Mitretek Systems Inc., a think tank near Washington, DC. He has published three books on computer forensics and countless technical papers. He also has a U.S. patent on high speed modems. He is also an adjunct professor in information security at Johns Hopkins and George Washington universities, a consultant to NASA, and a frequently invited lecturer on information security and computer forensics worldwide.

David R. Champion is an assistant professor of criminology at Slippery Rock University (USA). He is experienced in juvenile community corrections and is a former military police investigator. He holds a doctorate in criminology from Indiana University of Pennsylvania. Dr. Champion has wide-ranging interests in issues of crime and justice and has

published and presented work in topics ranging from criminal psychology to policing to terrorism.

Thomas M. Chen is an associate professor with the Department of Electrical Engineering at Southern Methodist University (USA). He received a BS and an MS from MIT, and a PhD from the University of California, Berkeley. He is associate editor-in-chief of *IEEE Communications Magazine* and a senior technical editor of *IEEE Network*. He is the co-author of “ATM Switching Systems.” He received the IEEE Communications Society’s Fred Ellersick best paper award in 1996.

Caroline Chibelushi is a research associate at Staffordshire University, Stafford, UK. Her research interests is in developing text mining techniques which combine linguistics and artificial intelligence methods to analyze spoken and written language in the areas of decision making and crime detection. She is the lead researcher on the ASKARI project. She is a member of IEE and WES.

Philip Craiger is the assistant director for Digital Evidence at the National Center for Forensic Science, and an assistant professor with the Department of Engineering Technology, University of Central Florida (USA). Dr. Craiger is a certified information systems security professional and holds several certifications in digital forensics and information security.

Chris Davis, CISSP, CISA, is co-author of *Hacking Exposed: Computer Forensics and the Anti-Hacker Toolkit*. He has managed worldwide teams in security architecture, design, and product management. His contributions include projects for Gartner, Harvard, SANS, and CIS, among others. He has enjoyed positions at Cisco Systems, Austin Microsoft Technology Center, and currently Texas Instruments (USA). He holds a bachelor’s degree in nuclear engineering from Thomas Edison, and a master’s degree in business from the University of Texas at Austin.

Dario Valentino Forte, CFE, CISM, has been active in the information security field since 1992. He is 36 years old, with almost 15 years experience as a police investigator. He is a member of the TC11 Workgroup of Digital Forensic. His technical articles have been published in a host of international journals and he has spoken at numerous international conferences on information warfare and digital forensic. He worked with international governmental agencies such as NASA, and the U.S. Army and Navy, providing support in incident response and forensic procedures and has resolved many important hacking-related investigations. He has lectured at the Computer Security Institute, the United States D.H.S. and D.o.D., the Blackhat Conference, the DFRWS (US Air Force Rome Labs), and POLICYB (Canada). Dario has given interviews with *Voice of America*, *Newsweek*, *the Washington Times* and *CSO Magazine*. At the moment he is adjunct faculty at University of Milano at Crema and provides security/incident response and forensics consulting services to the government, law enforcement and corporate worlds. For more information, visit www.dflabs.com.

Steven Furnell is the head of the Network Research Group at the University of Plymouth (UK), and an adjunct associate professor with Edith Cowan University, Western Australia. He specializes in computer security and has been actively researching in the area for 13 years. Dr. Furnell is a fellow and branch chair of the British Computer Society (BCS), senior member of the Institute of Electrical and Electronics Engineers (IEEE), and a UK representative in International Federation for Information Processing (IFIP) working groups relating to information security management, network security and information security education. He is the author of over 160 papers in international journals and conference proceedings, as well as the books *Cybercrime: Vandalizing the Information Society* (2001) and *Computer Insecurity: Risking the System* (2005).

Zachary Grant has dedicated his career to developing and deploying security solutions for both healthcare and financial institutions. Grant is an IT manager/security engineer for a large healthcare company headquartered in the southwest. In addition to his endeavors in the private sector, Grant serves as a captain with a state law enforcement agency, where he oversees the communications for the agency. His work with the state agency has lead him to integrate with many different local, state, and federal agencies where he concentrates his day to day security efforts bridging private industry security techniques into training and investigation methods for law enforcement.

Connie Hendricks received her BS in criminal justice from the University of Central Florida (USA). She currently serves as a senior digital forensics research assistant at the National Center for Forensic Science, where she conducts research on cyberterrorism.

Pallavi Kahai (pkahai@cisco.com) received her BE in electrical engineering from Yeshwantrao Chavan College of Engineering, India (2000). She received an MS in electrical and computer engineering from Wichita State University, USA (2005). During her master's program she worked on various research projects, focusing on statistical analysis, information security and computer forensics. She presented her work at International Federation for Information Processing (IFIP) Conference on Digital Forensics, 2005, Orlando, FL. She is currently working as a software engineer at Cisco Systems (USA) and works on IOS development and feature testing for Broadband Edge and Mid-range Routers.

CP (Buks) Louwrens has a BMil (BA) from the University of Stellenbosch (1985) and a PhD in computer science from the University of Johannesburg (2000), formerly known as the Randse Afrikaanse Universiteit. Professor Louwrens has more than 25 years experience in the fields of military intelligence, security, information security management, disaster recovery, business continuity management, and lately, digital forensics. He was appointed as part-time professor in the Academy for IT, University of Johannesburg in 2004 and is currently lecturing computer forensics at honors level. Professor Louwrens is involved in further research into digital forensic frameworks, in conjunction with Professor Basie von Solms. Professor Louwrens is employed by Nedbank Limited in South Africa as an executive in Group Risk Services, responsible for

information security management, digital forensics, and business continuity management.

Christopher Malinowski (BS, police science, John Jay College of Criminal Justice; MS management engineering, Long Island University) retired as a lieutenant from the NYPD after 20 years. Having started on patrol, he spent more than a dozen years as a systems programmer/supervisor on IBM mainframe computers in MIS. In 1996 he became the commanding officer of the new computer crimes squad in the Detective Bureau, responsible for responding to investigative technical needs for the NYPD and investigating computer-based crimes in New York City. He has served on committee for the Department of Justice sponsored National Cybercrime Training Partnership and has lectured on cybercrime related topics to various organizations. Currently he is an associate professor for the Computer Science Department at the CW Post Campus of Long Island University (USA).

Moiracarroll-Mayer (BA, MA, LLB, LLM) (moiracarroll2000@yahoo.co.uk) is a PhD research student with the Centre for Computing and Social Responsibility at the Faculty of Computer Sciences and Engineering, De Montfort University, Leicester, UK.

Chris Marberry is currently a senior digital forensics research assistant to Dr. Philip Craiger at the Nation Center for Forensic Science. He has graduated from the University of Central Florida (USA) with a bachelor's degree in information technology and is planning on pursuing a master's degree in digital forensics.

Andreas Mitrakas (andreas@mitrakas.com) is a legal adviser at the European Network and Information Security Agency (ENISA), Greece. He has previously been senior counsel at Ubizen (a cybertrust company) and general counsel at GlobalSign, (Vodafone Group). His research interests include the legal and organisational implications of technology in business and government. He is a qualified attorney (Athens Bar) and he has been visiting lecturer at the University of Westminster and the Athens University for Economics and Business. He has (co-)authored over 85 publications including *Open EDI and law in Europe: A regulatory framework* (Kluwer, 1997) and he is co-editor of *Secure Web Services in eGovernment* (IGP, 2006). He holds a PhD in electronic commerce and the law from Erasmus University of Rotterdam, a master's degree in computers and law from Queen's University of Belfast, a diploma in project management from ParisTech (Grandes Ecoles d'Ingenieurs de Paris) and a law degree from the University of Athens.

Kamesh Namuduri (kamesh.namuduri@wichita.edu) received a BE in electronics and communication engineering from Osmania University, India (1984), an MTech in computer science from the University of Hyderabad (1986) and a PhD in computer science and engineering from University of South Florida (1992). He has worked in C-DoT, a telecommunications firm in India (1984-1986). Currently, he is with the Electrical and Computer Engineering Department at Wichita State University (USA) as an assistant

professor. His areas of research interest include information security, image/video processing and communications, and ad hoc sensor networks. He is a senior member of IEEE.

Peter Norris is a teacher fellow and principal lecturer in computer science at De Montfort University (UK). His background is in technical computing, initially with British Steel in the early 1980s, through the design of non-conventional machine tool (ECM, EDM and Laser) automated machine vision systems during the mid 1980's and into academia in the late 1980s. His entire academic career has been devoted to constructing curricula which give students access to software where they are free to experiment and make/recover from mistakes in safety. For the last six years, this has been in the provision of pre-configured, open source, Web application development software. Most recently, this has involved the specification of the faculty's Forensic Computing Laboratory.

Ravi Pendse (ravi.pendse@wichita.edu) is an associate vice president for Academic Affairs and Research, Wichita State Cisco fellow, and director of the Advanced Networking Research Center at Wichita State University (USA). He has received a BS in electronics and communication engineering from Osmania University, India (1982), an MS in electrical engineering from Wichita State University (1985), and a PhD in electrical engineering from Wichita State University (1994). He is a senior member of IEEE. His research interests include ad hoc networks, voice over IP, and aviation security.

Golden G. Richard III holds a BS in computer science from the University of New Orleans and MS and PhD degrees in computer science from The Ohio State University. He is currently an associate professor in the Department of Computer Science, co-founder of Digital Forensics Solutions, a private digital forensics corporation, and a technical advisor to the Gulf Coast Computer Forensics Laboratory (GCCFL), a consortium of local, state, and federal law enforcement agencies. Dr. Richard is a GIAC-certified digital forensics investigator and teaches digital forensics and computer security courses at the University of New Orleans (USA).

Benjamin M. Rodriguez holds a bachelor's degree in electrical engineering from the University of Texas at San Antonio and a master's degree in electrical engineering from the University of Texas at San Antonio. He is currently pursuing a PhD in electrical engineering from the Department of Electrical and Computer Engineering, Graduate School of Engineering and Management, Air Force Institute of Technology (USA). His research is in the areas of image processing, wavelets and fractal based compression, digital signal processing, applied statistics, steganography, and steganalysis.

Vassil Roussev holds a BS and MS in computer science from Sofia University in Sofia, Bulgaria and MS and PhD degrees in computer science from the University of North Carolina, Chapel Hill. He is currently an assistant professor in the Department of Computer Science at the University of New Orleans (USA). His research interests are digital forensics and collaborative applications.

Hanifa Shah is a professor of information systems at Staffordshire University (UK) and a fellow of the British Computer Society. She has led a number of research projects funded by academic and commercial organizations. Her interests are in the design and development of information systems, knowledge management, IT for strategic management and facilitating university-industry collaboration.

Bernadette Sharp is a professor of applied artificial intelligence at Staffordshire University, Stafford, UK, where she heads the Informatics and Technology Research Institute. She is also a fellow of the British Computer Society. Her research interests include intelligent agents, text mining, natural language processing, and knowledge management. She has managed a number of research projects with industrial collaboration and has received funding from EU, EPSRC, and industry.

Sriranjani Sitaraman is a PhD candidate in computer science at the University of Texas at Dallas (USA). Her research interests are in the field of digital forensics and computer security. Sriranjani received a Bachelor of Engineering in computer science from Bharatiya University, India (1998) and an MS in computer science from UT Dallas (2001).

Bernd Carsten Stahl is a senior lecturer in the faculty of computer sciences and engineering and a research associate at the Centre for Computing and Social Responsibility of De Montfort University, Leicester, UK. He is interested in philosophical issues arising from the intersections of business, technology, and information. He is editor-in-chief of the *International Journal of Technology and Human Interaction*.

Jeff Swauger holds a Bachelor of Science in physics, a graduate certificate in computer forensics, and is also a certified information systems security professional (CISSP). Mr. Swauger has over 25 years of experience in the areas of information security, information warfare, modeling and simulation, and advanced weapon system development.

Kyriakos Tsiflakos, PhD, is the technology and security risk services partner in Ernst and Young Southeast Europe. Tsiflakos coordinates the delivery of technology and security risk services in the context of external and internal audits, regulatory compliance, IT due diligence, IT project risk management, information security, business continuity planning, and other engagements. He holds a bachelor's degree in engineering from the National Technical University of Athens, a master's degree in management information systems from Cranfield University, UK, and a PhD in operations research & computing from Imperial College, University of London. He is also a certified information security manager (CISM). As a researcher in the areas of information systems and operations research, Mr. Tsiflakos has published extensively and delivered presentations at conference and company venues throughout Europe, North America and the Far East.

Subbarayan Venkatesan (Venky) received MS and PhD degrees in computer science from the University of Pittsburgh (1985 and 1988, respectively). He joined the computer

science program at UTD in January 1989 where he is currently an associate professor. Venky has been a consultant for a number of companies in the Dallas area and has worked for Cisco Systems and Rockwell Collins. His research interests are in digital forensics, wireless networks, distributed systems, fault tolerance, and sensor networks. His work has been funded in part by numerous grants and contracts.

SH (Basie) von Solms holds a PhD in computer science, and is head of the Department of the Academy for Information Technology at the University of Johannesburg, South Africa. He has been lecturing in computer science and IT related fields since 1970. Professor von Solms specializes in research and consultancy in the area of information security. He has written more than 90 papers on this aspect most of which were published internationally. Professor von Solms is the present vice-president of IFIP, the International Federation for Information Processing, and the immediate past chairman of Technical Committee 11 (Information Security), of the IFIP. He is also a member of the general assembly of IFIP. Professor von Solms has been a consultant to industry on the subject of information security for the last 10 years. He is a member of the British Computer Society, a fellow of the Computer Society of South Africa, and a SAATCA certificated auditor for ISO 17799, the international Code of Practice for Information Security Management.

Jeremy Ward is services development director for Symantec in Europe. He has been with Symantec for five years. Previously with 18 years experience in the UK government, he has been a manager on large IT projects, has developed policy on personnel and telecoms security, and acted as an advisor on information security to the UK Prime Minister's Strategy Unit. Dr. Ward serves on a number of national and international bodies that produce policy and advice on information security.

Warren Wylupski has over 15 years of private sector leadership experience. He holds an MBA and is pursuing his PhD in sociology at the University of New Mexico (USA). His academic areas of specialization are sociology of organizations, criminology, and program evaluation. Mr. Wylupski's research and consulting interests are in the areas of police operations, organizational and white collar crime, organizational effectiveness, and process improvement.

Damián Zaitch (zaitch@frg.eur.nl) is a lecturer and researcher with the Department of Criminology, Erasmus University, Rotterdam. For the past 10 years he has researched and published on organized crime and drug policies in The Netherlands and Latin America. He earned his PhD (2001, *cum laude*) at the Amsterdam School for Social science Research, University of Amsterdam, with an ethnographic research on Colombians involved in the cocaine business in The Netherlands (Trafficking Cocaine [2002], Kluwer Law International) for which he obtained the Willem Nagel Prize in 2003. He is currently focusing his interests on other forms of cross-border transnational organized crime such as cyber crime in Europe and on corporate crime in Latin America. He is founding member of CIROC, the Centre for Information and Research on Organized Crime.
