The purpose behind affiliate marketing is to use publisher or affiliate website for promotion of merchant’s own products. The underlying benefit is its low customer acquisition cost and marketing expenses.

BACKGROUND

Affiliate marketing has the important ways to generate revenue for bloggers and other website owners. The companies are improving on the transparency in the business deals. Earlier Google Ad sense was the only option for bloggers for revenue. AdSense license was difficult to come by. Affiliate means a type of online marketing technique where an affiliate promotes a business through an advertisement on their web site and in return that business pays the affiliate with commission each time a customer generates sales. Affiliate marketing is also called performance marketing and associate marketing. The three parties involved in affiliate marketing are:- Advertiser, Publisher, and Customer. Advertiser can be any company selling products like electronics, books, clothing, and air tickets online or could be insurance company selling policies etc. Publisher is the one who promotes advertiser’s products or services through its website or blog. The final part of this cycle is customer who sees the advertisement, the click takes him from publisher’s website to advertiser’s website and on purchase it is called conversion. Amazon had started amazon.in in India to promote sales.

The companies choose affiliate to drive traffic to their own website and increasing the conversion. The satisfaction of customer is enhanced when you sell any product to customer. The conversion actually makes the customer aware about the company’s
