Chapter 13
Methodologies for Assessing the Traditional Learner

Learning Objectives. Assessment may be defined as “any method used to better understand the current knowledge that a student possesses.” (Dietel and Knuth, 1991). Assessment can be as simple as a teacher’s subjective judgment of student performance or as complex as a standardized achievement test. The concept of “current knowledge” implies that what a student knows is always changing and therefore teachers are to make assessments about their students’ achievements repeatedly throughout the school year.

The elements of technology-based materials and lessons introduced in this book have identical reasons for undergoing the scrutiny of formal evaluation as any other form of valid classroom assessment. The purposes of assessment are many, depending in large measure on the initiators of the evaluation. Administrators use assessment to set standards and policies, direct resources, establish goals, and monitor the quality of education. Learners gauge their progress, assess strengths and weaknesses, measure school accountability, and make informed educational and personal career decisions. And, teachers advocate assessment for individual diagnosis and prescription, curriculum revision and modernization, determination of student mastery, and to establish fairness in grading. In support of those objectives, Chapter Fourteen completes this examination of teaching and learning for the traditional learner by proposing that the reader of this chapter:

Methodologies for Assessing the Traditional Learner

- Become familiar with the characteristics of conventional assessment for the traditional learner.
- Apply the fundamentals of assessing the traditional learner with respect to writing, oral presentations, and performance-based learning outcomes.
- Apply the fundamentals of assessing traditional teaching and learning resources with respect to text-based, visual-based, and web-based materials.

Lesson Plan Template. Refer to Appendix A, Traditional Learner Lesson Plan Template as this chapter discusses Focus on Outcomes as depicted in Figure 1.
